SUMMARY

Computer Science undergraduate with a strong foundation in software development and a growing focus on Artificial Intelligence and Machine Learning. Skilled in building full-stack applications using the MERN stack and exploring data-driven approaches to develop intelligent, efficient, and scalable systems. Passionate about applying ML techniques to solve real-world problems and contribute to innovative AI projects.

EDUCATION

BS in Computer Science, KIET – Karachi Spring 2023 – Present
CGPA: 3.77/4.00 — 40% merit scholarship in all semesters

Intermediate (Pre-Engineering), Govt. Dehli Science College Aug 2020 – Aug 2022
Grade: A*

TECHNICAL SKILLS

Languages	Python, JavaScript, C++, C#, SQL
AI/ML Tools	TensorFlow, Scikit-learn, Pandas, NumPy, Matplotlib
Frontend	React.js, Bootstrap, Tailwind CSS, Redux
Backend	Node.js, Express.js, MongoDB, Firebase, JWT
Tools	Git, REST APIs, MVC, Google Maps API, Jira, Postman

EXPERIENCE

Junior SQA Engineer Jul 2025 – Oct 2025
Intersys Limited, Karachi

- Conducted manual and functional testing for web-based projects, ensuring high-quality product delivery.
- Collaborated with developers to report, track, and verify bugs using Jira and Postman in an Agile setup.

IT Support Specialist Sep 2023 – Jul 2025
Imam Zain Ul Abiddin Hospital, Karachi

- Managed 50+ systems and ensured smooth connectivity, server uptime, and hardware/software reliability across departments.
- Resolved network, system, and device issues and maintained biometric, printer, and access control devices.

PROJECTS

Online Food Ordering System — MERN Stack

Developed a full-stack food delivery web application with user authentication, cart functionality, and real-time order tracking. Designed a responsive interface using React and styled components. Backend was built using Express and MongoDB, with JWT used for secure login. An admin panel was implemented to manage menu items and view customer orders in real-time.

AI-Powered Recommendation System (Mini Project) — Python, Scikit-learn, Pandas

Implemented a simple recommendation system using cosine similarity to suggest food items based on user preferences. Experimented with feature vectors and clustering methods to improve accuracy and personalization.

Airbnb Clone — React.js, Firebase, Tailwind CSS

Built a dynamic property rental application allowing users to list properties, search using filters, and book accommodations. Integrated Google Maps for location-based search and Firebase for authentication and data sync. Designed with a clean, fully responsive UI using Tailwind CSS.
