SUMMARY

Full-Stack Developer and AI Automation Enthusiast who builds things that work — and then automates everything around them. Specializing in the **MERN stack** with a sharp focus on backend architecture, real-time systems, and **AI-powered automation using OpenAI, RAG pipelines, and n8n**. I don't just write code; I engineer solutions that reduce friction, cut response times, and scale without breaking. Currently shipping production-grade features at 10Pearls Pakistan while independently exploring the frontier of intelligent agents and workflow automation. 3.82 GPA. 40% Merit Scholar.

TECHNICAL SKILLS

Languages	JavaScript, Python, C#, PHP, SQL
Frontend	React.js, Angular, Tailwind CSS, Bootstrap, HTML5, CSS3
Backend	Node.js, Express.js, ASP.NET (.NET), REST APIs, JWT Authentication, WebSockets
Database	MongoDB, Firebase, SQL, Pinecone (Vector DB)
AI & Automation	OpenAI GPT, LangChain, RAG Pipelines, Text Embeddings, n8n, Prompt Engineering
Tools	Git, Postman, Jira, Socket.io, Google Maps API, Gmail API, Google Drive API

WORK EXPERIENCE

MERN Stack Intern, 10Pearls Mar 2026 – Present

- Built and maintained full-stack web applications using the MERN stack, delivering responsive and performant user interfaces.
- Designed RESTful APIs with Node.js and Express.js for secure, efficient data handling.
- Collaborated in Agile sprints with cross-functional teams, participating in daily stand-ups and code reviews to deliver features on schedule.
- Incorporated third-party services including payment gateways and Google Maps API to extend application functionality.
- Refined React components and state management for seamless real-time updates and fluid user interactions.
- Authored unit and integration tests to uphold code quality and minimize production defects.

Junior SQA Engineer, Intersys Limited Jul 2025 – Oct 2025

- Validated REST APIs across 5+ modules using Postman, strengthening system reliability by surfacing critical defects before release.
- Conducted functional and regression testing throughout Agile sprints, producing documented test cases to support stable, on-time releases.
- Partnered with developers to triage and resolve bugs, maintaining QA documentation and cutting average defect resolution time.

IT Support Specialist, Imam Zain Ul Abiddin Hospital Sep 2023 – Jul 2025

- Managed IT infrastructure including servers, networks, and databases to sustain 99%+ uptime across critical hospital systems.

- Diagnosed and resolved network, server, and database issues, minimizing downtime and preserving operational continuity across departments.
- Systematized repetitive support workflows via Python scripting, slashing manual workload and accelerating average response time.

PROJECTS

AI-Powered Customer Support Agent

- Architected a fully mechanized customer support pipeline using n8n and OpenAI that handles incoming emails end-to-end without manual intervention.
- Implemented AI-driven analysis to evaluate urgency, sentiment, category, and confidence score for each inquiry in real time.
- Incorporated Retrieval-Augmented Generation (RAG) with Pinecone vector search to fetch accurate product information from a live knowledge base.
- Engineered an intelligent escalation workflow that instantly resolves standard inquiries and alerts the manager with full context and a direct email link for critical cases.

Online Food Ordering System

[Live Demo](#)

- Engineered a scalable food delivery platform with JWT-based authentication and role-based access control for customers and administrators.
- Constructed RESTful backend APIs and an admin dashboard supporting real-time order tracking, menu management, and delivery status updates.

Streamify — Real-Time Chat Application

[Live Demo](#)

- Developed a real-time messaging platform supporting multiple concurrent users with low-latency communication via a WebSocket-based (Socket.io) architecture.
- Secured the platform with JWT session management and optimized event-driven data handling for high-performance, scalable message delivery.

Learning Management System (LMS)

- Launched a multi-role platform for administrators, instructors, and students with role-based access control and dedicated dashboards per role.
- Architected a modular RESTful backend and component-driven React frontend for long-term maintainability, performance, and extensibility.

EDUCATION

BS Computer Science, KIET – Karachi
CGPA: 3.82/4.00

2023 – Present
40% Merit Scholarship

Intermediate (Pre-Engineering), Govt. Delhi Science College
Grade: A*

2020 – 2022
